# vIGNAN IoT

Add More Rooms
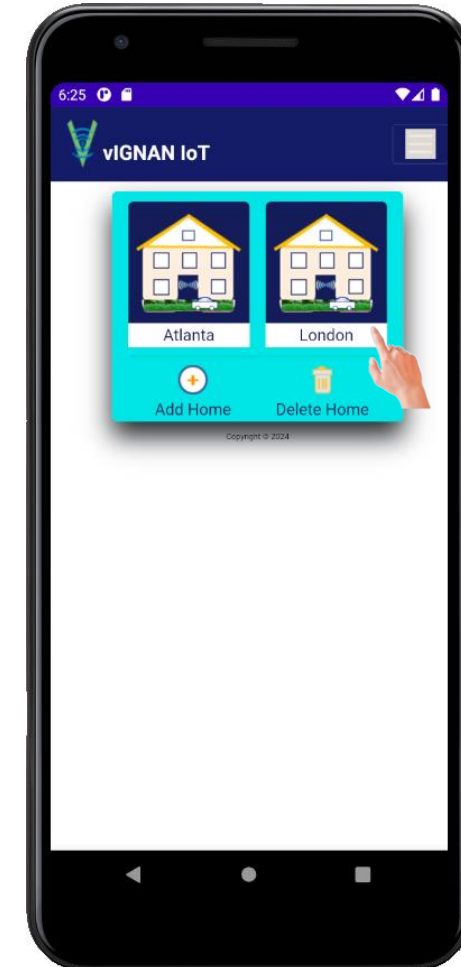

User Guide

Add Rooms

NOTE: *Creating a room requires to add a smart device as well. Creating only rooms without adding a smart device into it is not allowed. This is to avoid unnecessary clutter of empty rooms with no devices which serves no purpose.*

Adding a room in an existing Home

Click on "Atlanta" home
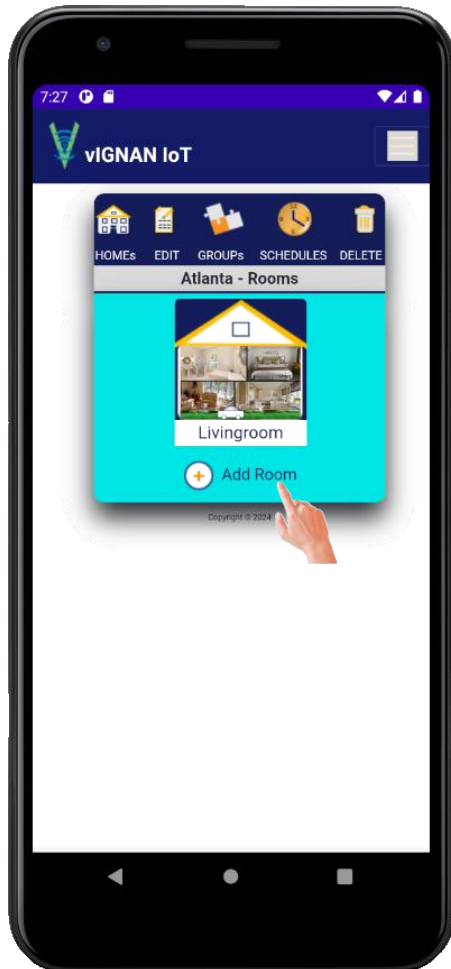

Adding a room in newly created Home

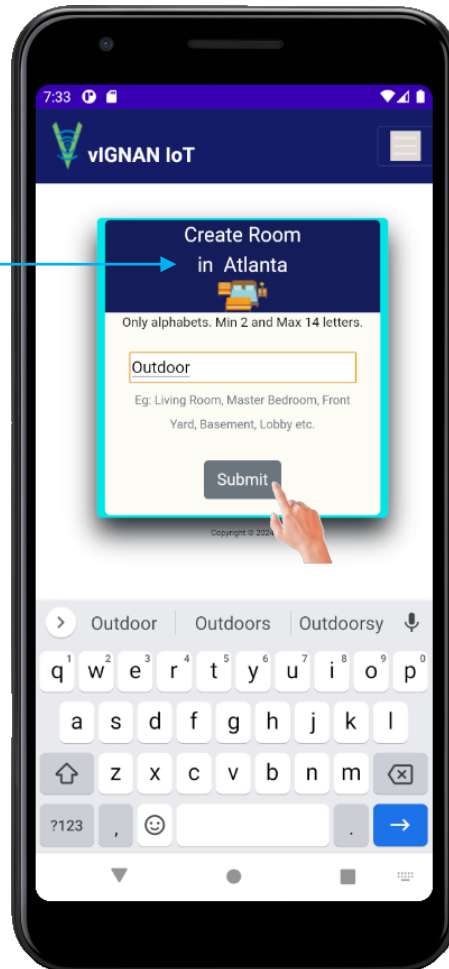

Click on "London" home

Add Rooms

NOTE: *Creating a room requires to add a smart device as well. Creating only rooms without adding a smart device into it is not allowed. This is to avoid unnecessary clutter of empty rooms with no devices which serves no purpose.*
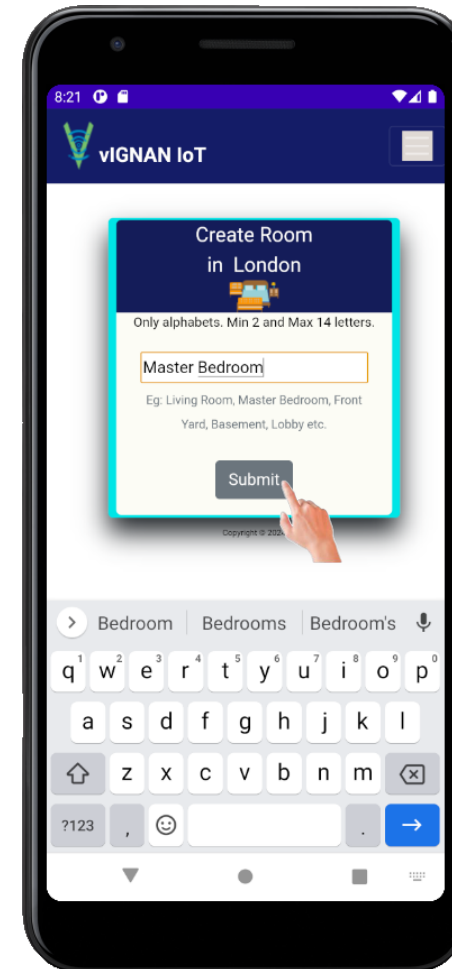

Adding a room in an existing Home

Adding a room in newly created Home

Home name

Click on "Add Room"

Type room name (Example: Outdoor) and click on Submit button
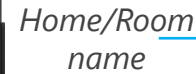

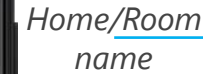

Type room name (Example: Master Bedroom) and click on Submit button

- *In newly created Home, there are no rooms to list. Therefore, when you click on the home it default takes you to "Create Room" screen*

Add Rooms

Adding a room in newly created Home

Home-Room name

Home-Room name

New Room: "Outdoor" is listed Click on room "Outdoor"

*Lists the light fixtures in Home: Atlanta and Room: Outdoor*

New Room: "Master Bedroom" is listed. Click on the room.
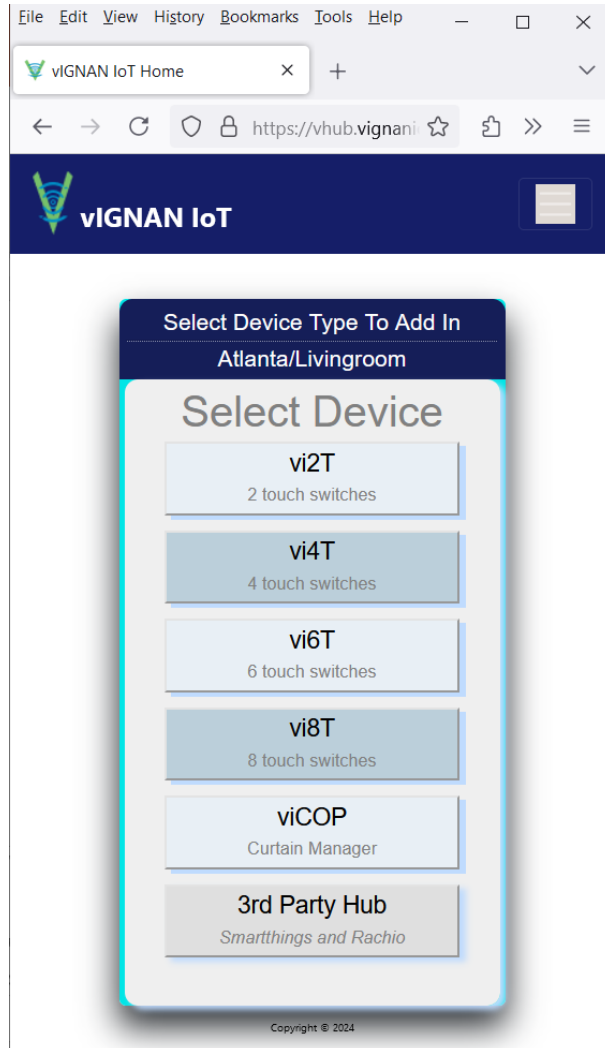

Lists the light fixtures in Home: London and Room: Master Bedroom

Congratulations!

You successfully added room and a smart device for both an existing home with another room and for a newly created home with no rooms.

Smart Device Types:

1. Check the type of vIGNAN IoT Smart device you have and accordingly select the button.

vi2T — **2 touch switches smart device**
- *Manages 2 x 110/220V devices*

vi4T — **4 touch switches smart device**
- *Manages 4 x 110/220V devices*

vi6T — **6 touch switches smart device**
- *Manages 6 x 110/220V devices*

vi8T — **8 touch switches smart device**
- *Manages 8 x 110/220V devices*

viCOP — **Curtain Operations Management device**

** — *3rd Party Hub*
Supports operations of smart hubs and devices discovered by these hubs (Support available for "Smartthings Hub" and "RACHIO" irrigation controller)
